

Virginia Correctional Enterprises Utility Mask

Virginia Correctional Enterprises (VCE) is producing a utility mask out of two different fabrics. The utility mask is made of two layers of a 50/50 polyester/cotton blend with an outer layer of nylon and is secured to the head with an elastic strap. VCE is not seeking FDA certification on these products, but is following CDC guidelines that authorize use of cloth masks should medical-grade supplies be unavailable.

VCE produced utility masks are not intended as a replacement for conventional and approved Personal Protective Equipment. These devices have not been industry tested nor have they been NIOSH approved.

Item # 50SP 20 0002
